Who Was Jules Verne?

Synopsis

Meet the father of science fiction, Jule Verne. Born in France in 1829, Jules Verne always dreamed of adventure. At age 11, he snuck onboard a ship headed for the Indies only to be discovered by his father and have his dreams dashed. After his father made him swear to only travel "in his imagination," Verne kept his promise for the rest of his life. He began writing adventure stories as a young man and became a popular writer throughout France. Known for mixing scientific discovery and literature in his books like *Twenty Thousand Leagues Under the Sea* and *Around the World in 80 Days*, Verne is often called "The Father of Science Fiction."
