The illustrations are really nicely done, it makes the book seem more expensive than what it is. My only critique - and this is not the author's fault of course- is that several times it asks the child questions about their home state. This is unfortunate for me because I got it as a gift for my godson, who is Swedish and lives in Sweden. I like to send him American themed things, and as he gets older and learns English in school he can handle more sophisticated books/activities having to do with the US. He has been to the US many times and been to several states so I was hoping this would be a refresher of things he's seen and learned. I suppose he can use the state I live in as his "home state" for the purposes of those pages. But overall a really well done book!

Not sure how they picked the people to feature for each State. Washington made sure to have a

special blurb on Hillary Swank, but made no mention of Bill Gates. If you know more about Hollywood than history, economics, science, industry, or tech, then this is your book. If you want your kids to learn about people who have truly been pivotal to this nation's history, then skip or get this for the pretty pictures only.

Wonderful companion book to the 50 States book! We're using this in our homeschool curriculum, and my kids really enjoy the stickers inside. The pull-out poster (double-sided) is great for reinforcement and learning. A great purchase - definite recommend!

I use this for homeschooling my 4th grade daughter. This book might be for younger children, however she loves the simplicity and the fun activities.
