Reading Structures: 39 Projects And Built Works

Synopsis

This monograph presents 39 complex structures by the Princeton University professor and structural engineer Guy Nordenson. The body of work, developed with architects and artists including Raimund Abraham, Henry N. Cobb, Steven Holl, Michael Maltzan, Richard Meier, SANAA, and many others, reveals Nordenson's unique contributions to a progressive collaborative design process as both engineer and designer. The structures in this volume span twenty-eight years, from his early work with Paul Weidlinger, to his formation of the New York office of Ove Arup & Partners, through the first 13 years since the 1998 establishment of his current independent practice, Guy Nordenson and Associates. The volume is organized around three thematic sections: Engineering Ephemera, Simply Supported, and Building History. It includes Nordenson's essays on these themes, as well as his individual project descriptions chronicling the vision and challenges of each. Barry Bergdoll, architectural historian, curator, and critic, provides an introduction.

Book Information

Hardcover: 376 pages

Publisher: Lars Muller (January 25, 2016)

Language: English

ISBN-10: 3037784725

ISBN-13: 978-3037784723

Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)

Best Sellers Rank: #69,322 in Books (See Top 100 in Books) #24 in Books > Arts & Photography > Architecture > Individual Architects & Firms

Customer Reviews

Beautiful drawings and photographs. A handsome book that bridges architecture and structural engineering.
