This is my second in the series of Batman coloring books. Once again, the stories in the book seem to be the same artwork as used in comics but with the colors removed. There is a lot of heavy black but that's okay with me. In order to darken the black or bring out details if I have colored over an area, I simply use my black pencil to darken the area/line again. What I really like about being able to âœcolor my comicsâ • is that I can now color my characters in traditional ways or pick my own color palette and go for it. For my first project in this book, I've chosen to go more on the traditional side but I will certainly have fun with colors in future projects. I'm hoping to see more comics available in coloring format. I will be looking for more of my favorites in the future. I've seen that DC Comics has a few on the back burner that are of interest to me as well. I will provide more details below about the

physical book but here is an overview of what I found in this coloring book:94 pages of black and white graphic novel plus title pageDesign printed on both sides of pagePaper is heavyweight and non-perforatedThree designs merge into the bindingBinding is both sewn and gluedAll markers (alcohol and water) and India ink pens bleed through the pageGel pens leave a shadow of color on the reverse sideColoring pencils work fantastic with this paperThe designs are printed on both sides of the white, heavyweight, non-perforated page. This is exactly what I expect from this type of coloring book as it is really a graphic novel. The binding is glued and sewn which makes it really sturdy but almost impossible to remove pages from the book. I don't intend to do so anyway, so no problem for me.
