Customer Reviews

This was an amazing book that really brings forth great animals through very intricate dots. I have never created such intricate designs in dot-to-dot in the past but I am so glad that I was able to find this and try this with my own daughters. You will love the pictures that you create as you go page-to-page in this remarkable book!*I received this for review - all opinions are my own*

Really challenging, super intricate, not your everyday dot-to-dot. These definitely aren't the puzzles you remember from grade school...they are 100 times better!!! The first one absolutely rocks!! Get out some sharp pencils, make sure you have enough time, and connect the dots. It's so theraputic!

Very cool dot to dot book. It is large (note the 10.8" X 14.8" size). I hadn't noticed it when I ordered.

Instead of differentiating different lines with sequential numbers, lower case letters and upper case letters, there are multiple sequences of numbers differentiated with colors.

This Dot to Dot is definitely extreme. It gives dots in the color you are supposed to do the lines. It has been a lot of fun and I enjoy doing it while watching movies or tv with my husband. The biggest challenge is finding the next dot after you lift your pen off. Each one will take a significant amount of time due to searching for the next dot in the design. I also colored in a few of the pictures and it added to the design.

This dot to dot is pretty intricate. I like the pages that require many different colors (I love color by number books). Some of the pages in this book only require 2-3 colors but some require more. I chose to color in the pictures after I connect the dots.

SUPER COOL! My 8 year old loves extreme dot-to-dot, and I always find the finished product really beautiful and interesting. This is the next step up. The dots on each page are colored, you connect them with a pen of the same color and in the end you have really beautiful, multi-colored images (as seen on the cover). We purchased a set of gel pens to go along with this gift and he has really enjoyed using them and finishing these puzzles. Great product, I hope to find more like it!

Wow! This is definitely extreme! I'm almost afraid to get started on it. Extreme is definitely an accurate description for this dot-to-dot book. The book is oversized, so don't expect your standard-sized book. And don't expect to finish a dot-to-dot in one sitting because it isn't going to happen. This book is not for the faint of heart, but it IS for the true dot-to-dot lover. When you finish one of the dot-to-dots puzzles using different color pencils that correspond to the dots, you will have an amazing picture that you will want to display.

i have to say i am into the first picture now about a quarter done and this will be wonderful. my review is early because i just noticed that this book is published by the same company that put out the extreme dot to dot book spectacular places with the pink cover and that so far has been the best each picture so i have no doubt this will keep me quite busy satisfied and calm for the rest of this year. there is so much here with both these books. thanks barrons publishing. thanks
