Customer Reviews

I am not an experienced cook, and this book makes me want to go to a farmer's market and buy everything interesting. This book is as much about how to cook interesting produce as it is about how to cook more interesting food - it's loaded with chef flavor tactics, pantry-enhancing suggestions, and straight-forward technique explanations (how to make my own fermented hot sauce!). McKenzie's stories about the ingredients are inviting and share a huge wealth of information about the ingredients (like why older nettles are gritty, the health benefits of burdock).

It's 150 recipes, but every ingredient intro section suggests about 5 more things you could do, and with all of the tips and potential substitutes, these recipes could just make my kale, spinach, potato and pork cooking better. An exciting discovery!
