Age Range: 8 - 12 years

Grade Level: 3 - 7

## **Customer Reviews**

I love to buy this kind of book for what I call a "car" book. We spend a lot of time in the car driving to places and I have a basket full of these fact filled books to occupy my kid's time with. This book has been a particular favorite of theirs. It starts many different conversations and leads to other questions that usually ends up with a google search. I find these books really interesting as an adult. There are so many things in it that no one really ever explains to you as a child. I would definitely purchase it again.

This is the most perfect book for our grandson who always has so many questions about everything. His questions apparently have very little rhyme or reason and seem to come out of the

sky. This is an intriguing book for anybody but especially for the child who has imagination and a deep 'need to know' as our grandson apparently does. I have enjoyed reading through this book and as a retired elementary school librarian, I definitely would want this book in the library. It is entertaining and informative and would be perfect for reluctant readers as well as those who question things. I find it to be a delightful book. My grandson does not know it yet but he and I will spend time together this summer with this book!

This is a really neat book! I bought this for my niece and I found myself reading it for awhile! Adults would find some of the stuff interesting - it's not just information for kids like "what are the colors of the rainbow", but there are really interesting topics in here! I would've preferred the pages to be a little thicker; they feel like magazine sheets: thin and flimsy. I hope this book will last long in the hands of a 10 year old!

My 9 year old grandson really likes it and the info in the book.

We leave these books in the car for driving around town. My kids read them to me. I learn, they learn, and read. It's a win win situation and interesting. Full of great facts!

My son and I love this book! We each pick a few sections every night and switch reading.

Great for entertaining and informing kids, and even adults. Basic but a great tool.
