# UNIX System Administration With Solaris 11.3: A Course For Beginners

## Synopsis

This course is intended to be a basic introduction to UNIX system administration. It is not intended to be an encyclopedic reference; it is designed to introduce the UNIX system to you, and equip you with basic skills to manage and run your own systems. You will learn to use Solaris 11.3, the latest version of the UNIX operating system. The goal is to get you used to working in a UNIX-like way rather than teaching you every possible command or technique.
