Games > Activity Books #246 in Â Books > Reference

Age Range: 5 and up

Grade Level: Kindergarten and up

Customer Reviews

School Zone does it again! My kids grew up using School Zone workbooks, and now my grandkids are using them! My 3 y.o. grandson didn't seem that interested in workbooks until he saw this one! Lots of colorful pictures, writing practice, number practice, and all kinds of fun adult-child activities (as well as things they can do on their own and with awesome success!) These newer, large books by School Zone are the best workbooks for kids by far! They encourage learning, confidence, and with the bigger size, take the intimidation out of kids taking on "big" reading books later in life! I used to review books for a homeschooling school locally for their curriculum, and was a tutor as well. These books are by FAR the best I've seen for young kids! They are fun for the children, they develop life-long skills and confidence and take the frustration out of learning! I'd recommend these for anyone with young children around, whether it be at home, grandma's house, at preschool, day care, kindergarten, something for the kids to do in the car, or even a doctor's office visit

(EXCELLENT for kids who are ill and miss school as well!) or where ever!! If I were to pick one workbook for a pre-K or kindergarten child, this would be it! Lots of color pictures (that lead to more learning through talking WITH a child, and not TO them!), as well as their basics they need in order to succeed. An awesome supplement OR curriculum for a pre-K or K child! I'd also suggest School Zone's other workbooks for older kids as well (especially the Phonics book for 2nd graders!) Many kids can do these at a younger age and do, so these are great confidence-builders as well!
