I really like this book for my 3 year old. She likes to learn so I've been teaching her as much as I can at home. She has other books but I wanted a comprehensive book that she could have fun with and

this was perfect. We just received it a couple days ago and I decided to take it to OfficeMax to make it into a spiral book for \$3.50. It was the best decision ever because the book is quite large and it makes it easier to flip through the pages and actually do the work. I'll post a picture.

We got these workbooks to work with our boys during the summer instead of allowing them to veg the entire time. They absolutely love them and ask to do them daily. It's something that is fun for them but still educational. What more could you want!!

Great great book for homeschooling. I have used different grade levels and this books covers almost everything. When you are finished, you can also move up a grade. The children are very interested in the pictures and enjoy doing schoolwork.

I bought this book for my 4 year daughter to work on through the summer in between preschool and kindergarten. This book has all different kinds of activities ranging from shapes, numbers, letters, writing...I love this book because my daughter has been able to have fun while learning and retaining the things she has learned in preschool. Even if your child has not attended preschool, this is a great buy. The activities are straight forward and easy to follow. My daughter will also be able to use this through Kindergarten as well. Great buy!

Great addition to home lessons. There are many pages of activities in various subjects. Pages come perforated so you can remove the sheets.

Large book with a lot of activities for a young child. My three year old has enjoyed doing the pages in the book. I have found it necessary to tear the pages out for her to complete them, but this is easy as they are perforated.

Nice workbook.

Love the tear out pages. My 3.5 year old does really well with the activities. Very happy with this purchase.
