Customer Reviews

Galaxy S7 The Complete Users Guide Manual Matthew Rivera. I DON'T THINK SO! This is a basic begin to operate your S7 phone. I was expecting the ins and outs of all the things possible to do with

the S7. Not even close. It is a thin little manual with no pictures, just basic instructions and some insight on the operations. I wish it had more.

This is best manual and user guide for the user of Samsung galaxy s7. This is the best book and i recommend this book to my friend a he bought new mobile and he need to read this book and understand the functions of the mobile.

The best guide on the Samsung galaxy s7 and it has each and every basic information about the mobile phone and also talks about the hidden features of it. I love this book . Looking forward to its next edition.

My friend bought new S7 and he didn't have enough knowledge about smartphones so i bought this book and gave him. After reading this book he have now all the basic knowledge about his new phone

This book if you can call it that(13 pages long of material) looks like it was written by a child, the reviews were, it looks like, all written by whoever wrote this phamplet, don,t buy it!
