Customer Reviews

ULTIMATE EXPLORER FIELD GUIDES is a new series from National Geographic Kids. These pocket-sized books are great for beginning naturalists looking for hands-on experiences. Each field guide is chuck-full of fascinating information. ROCKS & MINERALS by Nancy Honovich examines a wide range of rocks and minerals found around the world. The book begins with an overview of rock hounding tools and the basics of mineral identification. Minerals are then grouped into categories such as silicates and carbonates. After an introduction to rocks and the rock cycle, readers learn about igneous, metamorphic, and sedimentary rocks. The sections on fossils and dinosaur bones are likely to be popular with young readers. The book ends with a quick ID guide, glossary, resources, and an index. Librarians as well as young readers will appreciate the durable book covers

and compact format. Set up a spring display with a variety of field guides that encourage children to get outside and explore the natural world. Connect with STEM standards and real-world world science activities. Published by National Geographic Kids on February 9, 2016. ARC courtesy of the publisher.

Tons of great information, beautiful photos. Our daughter is learning so much from this little jewel of a book!

A nice little book for my adventurous little grandsons. Bought as a Christmas gift
