## Customer Reviews

This is an oversized dot to dot book with each puzzle having hundreds up to 1000 dots. Definitely not for a young child. Each puzzle is challenging and fun, the dots do not cross each other which is nice. When finished the pictures can be colored and displayed as art.

As someone still getting into more adult-oriented dot-to-dot books, this is a good one for going from beginner to advanced and fits perfect in the middle. I like that the print is bold and the pictures are interesting and quite varied. Good book!

Book pages have the dots from 150-400, it might be work with middle school students. The only thing I want to say is this book only has one picture for each page, not both sides. That might be a pity! But anyway, it is a good book

Gave as a gift. Liked the book but the numbers are very small so hard to read for a senior citizen.

Nice pictures, but very small print and lines sometimes cross over the numbers making them hard to see. Other dot to dot books use the \* to pick up the line at a different point, this book doesn't.

The numbers overlap one another, makes it difficult to draw the lines

Love this and they come out fun to color too!! I've given some to my 6th graders and they love them!!

These are great for everyone in the family to do, we have competitions to see who can finish first.
