Smart About Sharks

Synopsis

It's time to learn about the sea's most feared (and most misunderstood) residents: sharks! Owen Davey returns to nonfiction to explain the mysteries of those denizens of the deep. Some deadly, some not-so-deadly, and almost all just generally misunderstood. Exciting and detailed illustrations fill the page and educate young readers about these thrilling residents of the sea! Delivering information with the same whimsical text and brash illustration that saw his previous book win the affection of the Wall Street Journal, *Smart About Sharks* is sure to have teeth! Owen Davey is a freelance illustrator, living and working out of Leicester, United Kingdom. He graduated with a First Class BA in Illustration from Falmouth University. Davey's work has been published in every continent (except Antarctica), including picture books in the United Kingdom, America, Australia, Germany, France, Portugal, China, and Korea. He has worked for some impressive clients, including the New York Times, Microsoft, and Orange. This is his first book about sharks.

Age Range: 6 - 7 years

Grade Level: Kindergarten and up

Customer Reviews

SMART ABOUT SHARKS is a non fiction work of art from Owen Davey. Loaded with amazing facts about the different species of sharks. Paired with the boldly beautiful illustrations we've come to love from Davey. This book is a wonderful and interesting educational resource that would greatly enrich

any library. I received this book for free in exchange for my honest opinions. I was in no way compensated for this review. My opinions are honest and my own.

Owen Davey returns with another glorious nonfiction book about one of the most fearsome creatures that live in the ocean, sharks. His illustrations and bold graphic details bring facts about sharks to life. Personally I learned quite a lot from this nonfiction book, considering my son is a shark lover and a nature enthusiast. Did you know that sharks are 200 million years older than dinosaurs and that there are over 500 unique shark species alive today? Did you know that sharks do not chew their food? Instead they either swallow it whole, rip it apart, or crush it with jaws. Did you know that sharks may go through 30,000 teeth in their life time? That is insane! Did you know that there are few predators that hunt great white sharks? Great white sharks biggest threat are orcas, better known as killer whales. Orcas can flip these sharks onto their backs and hold them there until the shark suffocates. Yikes! Beside the breath taking illustrations and phenomenal facts Davey includes a wonderful contents page at the beginning of the book and an index at the end. I love books that include these two items. Children can use the content page and index to practice finding certain topics or favorite sharks. If you loved Owen Davey's nonfiction book, "Mad About Monkeys" you will fall in love with, "Smart About Sharks". @astoryaday

My son loves this book and reads to us from it regularly. Beautiful, stylized illustrations and enough cool shark facts to keep him interested for a long time to come.

Beautiful book for my little ichthyologist

Beautiful and informative
