# Nikola Tesla- Man Of Tomorrow: An Educational Coloring Book

## Synopsis

An educational coloring book by Niffer Desmond on the genius inventor, Nikola Tesla! The father of electricity contributed vastly to our modern age with his inventions- yet was virtually unknown until recently. This book brings his life to light with beautiful illustrations of stories from Tesla's life, ranging from a childhood discovery of electricity to his world changing inventions and even the famous Tesla vs Edison "Battle of the Currents"! (see 3rd photo). Now children and adults alike can learn about this genius while coloring in his legacy! Hours of fun and inspiration await in word hunts, mazes, and illustrated quotes from the Man of Tomorrow. 24 pages plus a color and cut-out 3D Wardenclyffe tower on the back! Printed on high quality 50% recycled art paper. Earth friendly, in every sense. NOTE: charges the customer 3.99 shipping for every book sold and does NOT combine shipping, so I will REFUND people for shipping overages so if you want to get two books or more, feel free!

## Book Information

## Customer Reviews

I'm an electrical engineer. I work in the power industry. I work directly with Tesla's technology on a daily basis. Tesla is a huge inspiration to me, both as a role model for my career, and as a human being. I even share Tesla's Slavic heritage. I have been working on tesla coils and other high voltage devices for fun for a few years now, and then I found out about this amazing coloring book. Having artists in my family and close friends who are artists I am always impressed by beautiful artwork,

and let me tell you this artist has some serious skills. Absolutely gorgeous imagery depicting scenes from Tesla's life and work. In addition to the beautiful art, on each page you learn about Tesla history. Its like a history book and coloring book in one. And the history isn't just what is commonly known about Tesla, but many obscure facts and details that you would only know by reading a biography of Tesla's life, which I have done many times in the past. For example the incident where Tesla's brother was killed while riding his horse. This event impacted Tesla's personality, and shaped his decisions in the future, even related to his career. But you wouldn't know about this unless you read a biography of Tesla. But you can find a page dedicated to it in the coloring book. I am impressed at how detailed the book is. I also find that every time I look at the book, I keep finding more and more hidden meanings and messages, especially concerning Tesla's love of the numbers "3 6 9". Its like a puzzle and mystery, and coloring activity, and history book all in one. Excellent job Niffer!

Skilled, web master, artisan, artist and writer, Niffer Desmond has created a beautiful concept that employs stunning drawings and clear, descriptive writing. Here is a one-of-kind superbly rendered coloring book concept that blends history, art and science in concert to bring inventor-scientist Nikola Tesla out of the shadows into light. What better way for families, children and adults to come joyfully together to explore a historical figure and moment in time that changed the world for the betterment of humanity. I see more than Tesla in its future because this book may well be the first of many unheralded histories that will bring inspirational men and women who deserve Niffer Desmond's visionary artistry. I highly recommend this book to all!

As a school Principal, I really appreciate this resource for young children to interact with the inventions and ideas of Nikola Tesla. We used this as a part of our science family night. Students and families were able to explore history through interacting with the art work. The book inspires discussion, exploration, and thinking about Tesla. It is important to continue the work of Nikola Tesla if we are to achieve more innovations in the areas of free energy for all people. This book is a creative resource that can appeal to scientists, artists, children, and adults. Take a look at the display from our Tesla Family Night below.

My niece is growing up with everything! So for her birthday I wanted to gift her something unique and educational. This beautifully illustrated coloring book offers her a glimpse into the world of a true mastermind. Also this informative coloring book allows her to feel creative while learning about the

life of an innovator truly ahead of his time. She has almost finished coloring and I am doing my best to keep up with the Nikola Tesla questions. There is no better gift than a gift that can expand the mind of a child.

This coloring book is a creative and enjoyable introduction to the life of one of my absolute favorite human beings, the great inventor Nikola Tesla. It is written and illustrated in a highly digestible and gorgeously-rich fashion for Tesla fans of all ages, and the coloring book format can be a meditative way of absorbing information. It is imperative that everyone becomes aware of this man's contributions, and what better way to introduce your kids to the life of this great master?

AWESOME, A coloring book for the aegis!!!! ;) Management is totally proud of you Niffer Desmond!!!!!! Insight like this comes once in a blue moon. Superior coloring book for the child interested in ==EIECTrICiTy+TrUtH== 88833888 ;)

I bought a copy of this coloring book for my brother for Christmas because he is an electrical engineer. It has been great at giving him something to do to unwind after work that is also interesting to him. What I didn't expect was the level of interest in the coloring book that my two young nieces showed. It gave them a way to interact with their father and learn something while he was enjoying himself and unwinding with some meditative coloring. This book is brilliant because it bridges all age groups and brings them together while teaching them to understand someone who was a great humanitarian... Someone who has otherwise essentially been written out of the history books.

I purchased this book for my son's 9th birthday. He loves it so much that he has asked for a second copy. The page about the Pigeon is his favorite. He says, "I like that I can learn, discover, and create stuff, which helps me relate to Tesla's process."
