Synopsis

The idea that one can contact extra-dimensional forms of intelligence by means of weed based sex magick has been circulating throughout the semiotic super structure of western psychedelic culture throughout the last half century at least. Back in the 70â ™s Robert Anton Wilson wrote about his psionic communiquÃ© involving the Sirius star system in the landmark book *Cosmic Trigger*, which posed the question: Can you contact your Holy Guardian Alien by means of stoned erotic meditation? Of course, he wasnâ ™t the only one quite publically tapping into the strange back in those days. Timothy Leary had his star seed transmissions, and the increasingly influential Phillip K. Dick siphoned information from a Vast Active Living Intelligence System projecting the hologram that is our â œblack iron prisonâ • from its position rooted firmly outside of time. Until I recently re-read the book *VALIS*, Iâ ™d completely forgotten that this process was initiated by the seemingly innocent experience of smoking high grade hash. Now, itâ ™d be nice to think that the concept of summoning supernatural guardian entities could be conveniently cordoned off into the realm of 70â ™s hippie overindulgence, but in the 90â ™s the connection re-established itself by means of Scottish comic book writer Grant Morrison. In his seminal Occult work *The Invisibles*, the author fictionalized his otherworldly alien contact experience in Katmandu and its profound ontological implications. Of course, I hadnâ ™t even read *The Invisibles* when I was summoned into Occult high strangeness in 2006. Hard Science-y types, like say Carl Sagan, have been trying to attribute alien contact phenomenon to sleep paralysis forever without further asking the question: what on earth is sleep paralysis? In mystery traditions throughout human history it has long been considered the gateway to astral projection, which is how I was summoned into magick if youâ ™re curious. I started playing around with Robert Monroeâ ™s techniques for astral projection in my late teens, and thatâ ™s the kind of shit that happens. Entities show up in your room in the midst of a pot nap one afternoon and summon you into some invisible psychedelic order of hive mind consciousness expansion. In 2012 I finally had to come to terms with something mind bendingly peculiar. Iâ ™d initiated what classic Occultists refer to as knowledge and conversation with my Holy Guardian Angel, and whatever this thing was I was communicating with, it was compelling me to document the psilopsychic intel it was telepathically projecting into my spirit. Just as I was finally considering doing so in a more calculated manner, my writing got picked up by *Disinfo.com*, a site that once threw a conference where Grant Morrison implored people to experiment with sigil magick quite specifically. Once that went down I was like, fuck it, Iâ ™m going to start broadcasting this shit right onto Facebook, partially because most of what I see on FB bores me to tears in the first place. Everyone I knew seemed cripplingly addicted to it. What I didnâ ™t even consider when embarking

on this bizarro social media art project was that in posting my inner workings publically, I'd end up accidentally predicting the future on multiple occasions quite demonstrably. This book is not only possibly the most complete documentation of an ancient and mysterious Occult phenomenon, it's also a rather inarguable demonstration of what unfairly marginalized scientists have long been referring to as psi phenomenon. It's quite a magick trick, and an outright assault on popular materialist theories in regards to the nature of dreams. Turn on, tune in, watch me pull a rabbit out of my hat.

Reading this will probably give different people different trips. For me, it heightened my awareness of the future, both of past instances and of the present moments of awareness. It has made me more aware of the thinness of the veil between the physical world and the spiritual world — something that continues even to today.

As interesting as you might expect from a Facebook post compilation, or reading someone else's dream diary. Occasional nuggets of gold, but mostly sand.

Transmissions From Outside of Time aka The Compendium of 5th Dimensional Wisdom! In his newest magickal working, Thad McKraken reveals the cheat codes to this game called life. How this information is relayed to Thad is incredible. He seems to have access to places that most people couldn't even comprehend or are too scared to venture to. Reading his words felt like cosmic

information was being downloaded directly into my brain. Thad's ideas of humans (who we are, why we are here, and the nature of time) will challenge you to reconstruct the reality tunnel you have dug for yourself.

Thad is at the cutting edge of what we would call "Chaos Magick." This is a continuation of his personal journey, yes. But it is also a highly readable, enticing, and engrossing narrative that we all can identify with. Through his personal journey, Thad explores the things that hide behind our universal social and spiritual psyche. Throughout, Thad outlines a comprehensive and excellent outlook on the newest fronts of Chaos Magick (or "psych magick) and doesn't hold back in the least about giving you all the fine details. A highly recommended read for anyone that is searching for the very latest in occult literature.

If you get it, you will not regret it.
