Listen To The Stars

THE COMPLETE MESSIER OBJECTS
Audio Book

JJ EVANS

MP3

Synopsis

Listen to the Stars is an audio experience that was designed to enhance your binocular and/or telescope viewing sessions to the stars. Instead of reading about your favorite celestial object, now you can listen to the fascinating facts and history that will hopefully enrich your enjoyment of astronomy as you view distant stars, galaxies, and nebulae. All this while never having to take your eye away from the view. This volume will feature the famous 110 Messier Objects. These targets are some of the most sought after objects to be viewed. The audio will completely immerse you into the views. You will discover that your view will take on a more interesting aspect as the narrator describes the finer details that you may not be aware of. Whether you are new to astronomy or a seasoned veteran, this audio experience will certainly add a new perspective to your session. And for those that feel they have seen it all, revisit some of your favorites while listening to the audio. It will add new life into your old views.
