# Everything You Need To Ace World History In One Big Fat Notebook: The Complete Middle School Study Guide (Big Fat Notebooks)

## Synopsis

It's the revolutionary world history study guide just for middle school students from the brains behind Brain Quest. *Everything You Need to Ace World History . . .* kicks off with the Paleolithic Era and transports the reader to ancient civilizations from Africa and beyond; the middle ages across the world; the Renaissance; the age of exploration and colonialism, revolutions, and the modern world and the wars and movements that shaped it. The BIG FAT NOTEBOOK series is built on a simple and irresistible conceit "borrowing the notes from the smartest kid in class. There are five books in all, and each is the only one book you need for each main subject taught in middle school: Math, Science, American History, English, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in marker colors. Definitions explained. Doodles that illuminate tricky concepts. Mnemonics for a memorable shortcut. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

I home school two boys and friends and family are always asking how I know what to teach my kids. It cracks me up, but now I can say I have a guide that tells me everything they need to know for middle school according to Common Core. We officially don't follow Common Core in Texas, but in reality the schools teach it since the kids have to take standardized tests that follow it. These guides are great! I read them to my 4th and 6th graders and then supplement with YouTube/history channel/etc videos and books with photos. It is nice to know that I am covering at least the minimum they need in case they ever have to go to public schools. God forbid. ;-)|I think these books explain things well and I like the questions at the end of each chapter. These are really a great resource for homeschooling. I personally am not a fan of paying big money for curriculum, so these books are a valuable and affordable resource.

I was thrilled to continue to offer my kids more from Brain Quest as they got older. As soon as I saw these, I purchased 3 from the series. The layout is very nice. It's visually engaging. Questions and answers (set up for the reader to check themselves) are offered at the end of each section. Only Advisement:\*\*My only advisement to some that would have issue with this- it's heavy on the evolution theory at the onset in particular (first two sections) of the World History book. Timelines and text present this theory as solid fact. If this is a point of contention for you, perhaps you might want to pass on the World History selection.\*\*

I saw this at our local membership warehouse club that starts with a C. They were cheaper there and I fell in love with the whole series! Science, English, World History and US History! I wish my kids were still in middle school so that I would have an excuse to buy them. Yet, I may just buy them for myself :-). They look like they would be a fun supplement for the kids' curriculum in middle school. Very colorful and full of information that is well presented with quizzes and answers at the

end.

I am a middle school Social Studies teacher and recently purchased this book for myself. This is a great resource for helping your child study Prehistory through the modern world. It is color coded and explains the content in terms a middle school student would easily be able to understand. I highly recommend this and would get a classroom set if I could!

Excellent book for review and teaching. Your young student will enjoy it.
